

Your Simulation

U-Value
0.42 W/m²K

Summary of Product Selection

Hybris 50mm thickness

A new reflective insulation product providing an excellent thermal performance associated with low emissivity films.

For a full calculation and more details about these products, please email solutions@insulation-actis.com or call us on +44 (0) 1249 462 888

Disclaimer:

The information presented in this simulator is intended as a guide only and to illustrate how ACTIS Hybrid reflective insulation products can achieve U-value results for the four specific building applications. Each construction project is unique in its design and requirements.

All the calculations have been made according to EN ISO 6946.

Whilst we hope you will find this tool useful, the results are indicative and should not be regarded as a final calculation. Please contact our technical department to receive a project specific U-Value calculation.
