

Your Simulation

U-Value
0.47 W/m²K

Summary of Product Selection

HYBRIS 50mm thickness

A unique reflective insulation product providing an excellent thermal performance associated with low emissivity films.

For a full calculation and more details about these products, please email solutions@insulation-actis.com or call us on +44 (0) 1249 462 888

Disclaimer:

The information presented in this simulator is intended as a guide only and to illustrate how ACTIS Hybrid reflective insulation products can achieve U-value results for the four specific building applications. Each construction project is unique in its design and requirements.

U-value calculations have been made according to EN ISO 6946, BR 443, BBA IB3. The solutions offered do not have a condensation risk according to BS 5250.

Whilst we hope you will find this tool useful, the results are indicative and should be confirmed with a final calculation. Please contact our technical department to receive a project specific U-Value calculation.
